# Turn Work Zones Into Safe Zones

Tools and Technology to Protect Workers and Keep Your Business Operational

Zebra MotionWorks® Proximity combines automated contact tracing with user-level proximity alerts to contain exposure and empower your workers to maintain distance.

1 Easily pair each employee with a **sanitized device** to start their shift in seconds

2 **Provide Proximity Alerts*** to promote social distancing

3 Automatically **register Proximity Events** when employees are within 2m/6ft. over a period of 5 minutes

4 See live **Proximity Events** via the web-based dashboard

5 Disassociate employee from device at end of shift and follow **sanitizing procedures**

6 Instantly access **Contact Trace reports** to identify individuals who have been in contact to reduce spread

7 Have the **quantifiable data** to address a select group of individuals vs. shutting entire facilities

* Audio and vibration alerts available based on device capabilities. See supported device slide for alert capabilities.

Purpose Built:

Durable for industrial environments

Engineered for enterprise

Key Benefits:

- ✓ Utilizes existing Wi-Fi® and **requires no new infrastructure**
- ✓ **Deploys remotely** in a matter of days
- ✓ Includes **easily accessible web-based reports** from the cloud
- ✓ **On-device Bluetooth**® sensing of proximity
- ✓ Offers **multi-purpose, enterprise devices** for added ROI
- ✓ **No personal or medical data is stored** in the cloud
- ✓ Employee **data can be anonymized**

Points of Success:

Deployed in **multiple sites globally**

90% **time reduction** in contact tracing post-exposure

75% **reduction of proximity** events over a one-week period
